INTERPRETIVE AND TECHNICAL NOTES

- Flags: H above reference interval, L below reference interval. No result met critical value criteria.
- LDL cholesterol calculated by the Friedewald equation; not reportable when triglycerides exceed 400 mg/dL.
- eGFR calculated using the 2021 CKD EPI creatinine equation without a race coefficient.
- Reference intervals are age and sex specific and apply to this laboratory and these methods only. Values from other laboratories are not directly comparable.

- Method codes: FLOW flow cytometry, PHOT spectrophotometry, ENZ enzymatic, ISE ion selective electrode, CLIA chemiluminescent immunoassay, HPLC high performance liquid chromatography, LCMS liquid chromatography tandem mass spectrometry, IMMU immunoturbidimetry, IDMS isotope dilution mass spectrometry traceable, CALC calculated.
